

CUSTOM AUGERS

With over 30 years of drilling knowledge and manufacturing experience, Digga can provide you with a custom auger solution for any drilling application. Constructed with the highest grade steel in Digga's fully equipped locally owned and operated manufacturing facility ensures you're only getting the best quality and durability.

Our experienced drilling specialists will help you in constructing the right auger for your needs. Everything from the right cutting head to flight and pitch configurations and also choosing the right wear parts and accessories.

Features

- Variety of cutting head solutions
- Exceptional quality using superior materials
- Custom flighting and pitch configurations
- Wide range of wearparts and pilots to suit most ground conditions
- Square, round and hex hub options available to suit your existing drive unit or drilling rig
- Custom augers can be made to any length and to preferred drilling diameter

Ideal Use

Drilling through all ground conditions - Soil, shale, rock and land fill.

Machine Suitability

Customer augers can be made to suit most micro machines, large foundation drilling rigs and everything in between.
